Eh, 4000+ hours later, they deserve 10 bucks. Or 20 as the case may be. <see also the zombie auto clicker>. Interesting Asteroids style game with a ton of mechanics going on. Definitely worth it at \$2 if it looks like your sort of thing.

I highly recommend toning down some of the visual effects.. I actually forgot all about this and that I even purchased this DLC when I got the game, I bought the game and some DLC a couple of months before I got around to playing it. Anyway, So I'm playing now for a while and just thought that was a part of the game, I haven't played without it so I would not know how different it would be.

But overall I think it's cool. I've spent a lot of time playing with that alone, so it sure does add quite a bit of play time.. Ultra modern twist on a classic. Because of this you should kind of already know what to expect. If not, they've been kind enough to provide a demo. Either way, the game is very fun and it's only going to get better (early access).. I LOVE THIS GAME <3

To be honest they should implement steam overlay so I can take so many KAWAII~ screenshot and put it in my steam artwork.

They also need to add more routes, even if its on DLC , I'll gladly buy it.
I'm hoping u guys add Ruriko route~

Edit: Incoming Princess Evangile 2 Hype!!!~. A roman clicker version of The Guild series. Dark mode is a great addition..
Good speedgame

Very good story and deeply thought provoking. I wish it gave you the option of making your own decisions but then you wouldn't get the great ending. At the end I felt like this is the start of a great future for this game. I want to be this person and continue with more of an open game and more game playing mechanics.. I love playing this fun game with my brother/friends.. not as challenging as previous versions of this stalwart casual puzzler

69/100. tbh, the price tag was the big reason why i never bought this game. not because i'm a cheapskate (i kinda am, tho), but because i wasn't sure if i'd play it enough to get my money's worth. i'll play a game for a while, then never play it again (i have an on again\off again relationship with swtor). also, i didn't know if i still had the patience to learn a game as complex as this one is. so, a few days ago, a deal popped up that was too good to pass up and i said, "what the hell," and took the plunge.

the last few days i've been taking baby steps, not trying to overwhelm myself while getting used to playing an in-depth military sim again after years of absence. now, after completing several tutorials, i see what i've been missing all this time. this took me right back to my days of playing harpoon on my packard-bell 286 and various subsim games over the years. this is pretty much every type of military sim all rolled into one with an amazing database of materiel to support it. i'm pretty much hooked already and i'm not even playing real scenarios yet - a great sign. i can see that come winter, i'll still need a tan because this is what i'll be doing in all my free time.. Issa good game. Full of puzzles n stuff. yeet
