So, this game, is

It's a multiplayer game and it has literally zero players playing it, with no bots.

But even if it had players, there are certain things that you really want to except from the game that has a ripoff M4 carbine that doesn't even have properly aligned iron sights due to a lack of carry handle.

You except it to either shoot burst, or full auto. Well this game's M4 has THREE firemode options.

Semi, single, and auto, in that order.

Semi does what you except it to do, and fires a 3 ROUND BURST.

SINGLE does what you thought it wouldn't do, and fires a singular shot.

And auto will fire a 3 round burst, and fire reguarly after so by holding down M1.

The glock doesn't even put the irons up to your face.

There are more populated, and free roblox shooters, yes, ROBLOX shooters that have an active playerbase, that are much more worth your time than this thing.

If it was free, it would have an excuse, but at over 8 bucks, i'm gonna put my foot down.. dis is gud game. buy dis game. 10/10 IGN. You won't be disappointed. Well worth the money.. idk i need this for a badge . Brings back the feels from the old FPS days needs work but i had fun playing it.

You need a older mouse or a mouse with low DPI though, my Razer HYdra did not work with it had to dig up my old 2006 mouse.. A simple design game that test our persistence and finger agility. No options, no configurations, just enter the stages and begin.

Have to run each stages repeatedly.

First to gather all the sticks and heading to the exit while mapping the path, second is to repeat the process of heading to the exit till you Ace the stage, or vice versa.

Test of endurance with zero error of mistake, every keypress is crucial, every milliseconds counts. Prepare to get your fingers numb.

The price is moderately low, Recommend to try if you have the patience.

Good Game.. I highly recommend this game. There's no such thing as a truly perfect game, but i see very high hope and would love some content! blacksea odyssey has the most interesting monsters and gameplay ive seen from any game, This is a classic in the making and i hope and expect that it will influence game design for years to come, I love the gameplay of this and am excited for whats to come :D if you are looking for a fun game with lots of diversity and different gameplay, then this is it.

Much better than Ko-SHIT-gama.. Basically Starscape is somewhat fun, and I played through it a long time before I got it on steam, then I played half through and the past days I finished it. The game has nice mechanics, but it is repetitive. The story could be interesting, but somehow isn't really in the end.

There are only 2 things which really bother me about it.

1: The resolution is limited to 800x600, which brings a lot of problems on newer hardware, and that resolution even bothered me way back then.

2: There are achievements for finishing the game on Easy, Normal and Hard. As opposed to common sense, finishing hard does not give the other 2 achievements as well, so you'd need 3 playthroughs to get all achievements, which is ridiculous.

If someone has endgame saves for easy and normal, please take a look at the discussion section of this game, it'd be cool to have those 3 saves here so the achievements could be achieved properly.

So yeah, with those flaws and after all this time it's just not worth 10€ anymore. If it's ever on sale again you might consider grabbing it if the points above don't put you off.. was good 4 years ago, now its just dead dont buy it unless you wanna wait 4 days for a refund.

Why is this on steam, you can see it's from the 90s from the intro, it hasn't held up well, You have to do 6 of the slowest 300mph laps in the world or more before you even finish one race and it just drags as you are barely able to turn at times even using advanced techniques.. as many have said- Lag, bad lag. overdid the graphics an under-did the gameplay. and the gameplay mechanics. got a long way to go there.

ai make no sounds, wolf when attacking makes no sounds, and theres a lil uglee dwarf guy has flaming arrows -either one of these kills u evryday, today, both at once, I suppose the wolf (or fox) works with the lil dwarf guy.

alls I managed to make is basic bow an that dont even kill a geese or whateva thats supposed to be the white bird by the lake, shot a deer 10 times ran out of arrows an it ran away. hope u like mushrooms, aint seen no berries they talk about, but no matter, the lil guy or the fox gonna kill you everyday anyways, or both of them at once.

try somthing else- frustratingly unfinished, should be way better by now released in oct 2016. Extremely addictive and very low price. a winner. Seriously, a seemingly underrated game. I have loads of fun playing it. I just wish more people would.. BUY IT! For less than \$1 on the current sale you have a charming, deep and incredibly addicteve game. Feel your self taken back to the golden age of PC games, let the midi loops sweet over you as you play just one more turn.

The interface is a bit of a bear, but its gets the job done.

10V10

Would allocate peasant labor again.. Java gaming FTW!. There are definite improvements since the last instalment. The puzzles are more thought out but can still be difficult if you don't pay attention. The story is also more developed and I look forward to seeing what happens next!
